

Your Simple Alternative to Citrix

Now you can deliver your applications without the complexity!

Propalms TSE extends Windows Terminal Services, in a similar way to Citrix, offering 100s of features for managing your Terminal Services Environment. TSE is designed to provide you all the functionality that you need from a Citrix environment but at a fraction of the cost, not only in licensing terms but in on-going management of the system. Don't struggle any longer with multiple, complex consoles and steep learning curves; the intuitive TSE Web Management Console provides a single point of administration guiding you through the management tasks, quickly and easily.

Why pay for features you don't need?

TSE provides the 'real-world' features that organisations need today.

Affordable to deploy everywhere

TSE is priced to enable wide-scale deployment across organisations.

Faster ROI

TSE's reduces initial and ongoing investment meaning faster return on investment for your business.

Reduce Support Costs

Install, configure and manage without specialized, costly IT personnel.

Reduce Complexity

There is just one version of TSE, scalable from Small Businesses up to Enterprise customers, including all the features with simple concurrent licensing.

Flexible Vendor Support

Propalms listens to our customer's needs and responds to those needs.

Why Choose TSE over XenAPP?

In the main, Propalms TSE and Citrix XenAPP provide the same functionality with very similar feature sets. What differentiates the products are mainly cost and simplicity of use. However it is important to see a comparison of features in order to understand that there is NO reason not to go TSE!

OVERVIEW	TSE 6.0	XenAPP 5.0
